

CBCS SCHEME

15IS72

Seventh Semester B.E. Degree Examination, Feb./Mar. 2022

Software Architecture and Design Patterns

Time: 3 hrs.

Max. Marks: 80

Note: Answer any FIVE full questions, choosing ONE full question from each module.

Module-1

- 1 a. What is Object – Oriented Development? Describe the key concepts of object oriented design. (10 Marks)
- b. Describe Design patterns. (06 Marks)

OR

- 2 a. List the benefits and drawbacks of paradigm. (06 Marks)
- b. How Design pattern Solve Design Problems. (10 Marks)

Module-2

- 3 a. Describe the business processes of the library system. (08 Marks)
- b. Briefly explain Functional Requirement specification by means of use case analysis for the library system. (08 Marks)

OR

- 4 a. Explain the Design process. (08 Marks)
- b. Illustrate sequence diagrams for any two
i) Adding new members ii) Issuing Books iii) Printing Member Transaction
Pertaining to a library system. (08 Marks)

Module-3

- 5 a. Describe a class adapter towards its structure, participant, Collaboration and Consequence. (08 Marks)
- b. Explain the Bridge pattern, Motivation and applicability. (08 Marks)

OR

- 6 a. List out the issues in implementing composite pattern. (08 Marks)
- b. Write short note on : i) Facade ii) Proxy. (08 Marks)

Module-4

- 7 a. What is MVC architecture pattern? Explain and list the benefits. (08 Marks)
- b. Explain Designing the system, subsystem for an interactive system. (08 Marks)

OR

- 8 a. List the issues in context of implementing the undo operation. (06 Marks)
- b. List the characteristics of Architectural pattern (05 Marks)
- c. Write a note on different Architectural pattern. (05 Marks)

Module-5

- 9 Explain in detail JAVA REMOTE METHOD INVOCATION. (16 Marks)

OR

- 10 a. Explain HTML and Java servlets pertaining to object oriented system on the web. (08 Marks)
- b. Write a note with minimal consideration is designing and developing a web-based version of a library system. (08 Marks)

Important Note : 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.
2. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8 = 50, will be treated as malpractice.

CBGS SCHEME

17IS72

Seventh Semester B.E. Degree Examination, July/August 2022
Software Architecture and Design Patterns

Time: 3 hrs.

Max. Marks: 100

Note: Answer any FIVE full questions, choosing ONE full question from each module.

Module-1

- 1 a. Discuss the step-by-step approach of applying a design patterns effectively. (06 Marks)
- b. Explain the benefits and drawback of object oriented development. (04 Marks)
- c. Illustrate how to maximize reusability of design patterns and explain common causes of redesign. (10 Marks)

OR

- 2 a. Discuss the approaches to find the right design pattern that is suitable for your pattern. (05 Marks)
- b. Explain the key concepts of object oriented diagram with suitable example and diagrams. (15 Marks)

Module-2

- 3 a. Consider a hotel reservation system supports the following functionalities, write usecases for each and define business rules.
 - i) Room reservation
 - ii) Customer check-in
 - iii) Customer billing
 - iv) Room services. (12 Marks)
- b. Draw class diagram for library system and explain. (08 Marks)

OR

- 4 a. Discuss major steps involved in analysis phase with suitable example and diagram. (12 Marks)
- b. Compare functional requirements versus non-functional requirements with suitable example (library system). (08 Marks)

Module-3

- 5 a. A system need to be created to manage the Soccer game. Generalize the game pattern for the following operations:
 - i) Start the game
 - ii) Select 2 teams
 - iii) Add or remove players to / from a team
 - iv) Pick playground
 - v) Start a match. (10 Marks)
- b. Describe the motivation, structure, participants and collaborations of composite pattern with suitable diagram and example. (10 Marks)

1 of 2

Important Note : 1. On completing your answers, compulsorily draw diagonal cross lines on the remaining blank pages.
 2. Any revealing of identification, appeal to evaluator and /or equations written eg, 42+8 = 50, will be treated as malpractice.

17IS72

OR

- 6 a. "Decouple an abstraction from its implementation so that the two can vary independently"
Justify the statement. (10 Marks)
b. How do you define an Adapter pattern? Illustrate the motivation and structure of adapter
pattern. (10 Marks)

Module-4

- 7 a. With a neat diagram, explain MVC architecture and alternative views of the MVC
architecture. (10 Marks)
b. Apply the MVC architectural pattern to the process of designing a simple program that
allows us to create and label figures. (10 Marks)

OR

- 8 a. Draw and explain the sequence diagram for adding a line. (05 Marks)
b. Draw and explain the sequence diagram for adding a label. (05 Marks)
c. Show the designing of model, view and controller subsystems of simple drawing program.
(10 Marks)

Module-5

- 9 a. Analyze how library subsystem can be deployed on www with suitable diagrams. (10 Marks)
b. Write HTML code for entering the library information for books and members details. Also
explain uses of GET and POST methods. (10 Marks)

OR

- 10 a. Explain the basic architecture of client/server systems and discuss the methods to overcome
the difficulty in accessing objects running different JVM. (10 Marks)
b. Draw and explain the following:
i) State transition diagram for issuing books
ii) State transition diagram for renewing books. (10 Marks)
