

SOFTWARE ARCHITECTURE AND DESIGN PATTERNS (Effective from the academic year 2018 -2019) SEMESTER – VII			
Course Code	18CS731	CIE Marks	40
Number of Contact Hours/Week	3:0:0	SEE Marks	60
Total Number of Contact Hours	40	Exam Hours	03
CREDITS –3			
<b>Course Learning Objectives:</b> This course (18CS731) will enable students to:			
<ul style="list-style-type: none"> <li>Learn How to add functionality to designs while minimizing complexity.</li> <li>What code qualities are required to maintain to keep code flexible?</li> <li>To Understand the common design patterns.</li> <li>To explore the appropriate patterns for design problems</li> </ul>			
<b>Module 1</b>			<b>Contact Hours</b>
<b>Introduction:</b> what is a design pattern? describing design patterns, the catalog of design pattern, organizing the catalog, how design patterns solve design problems, how to select a design pattern, how to use a design pattern. A Notation for Describing Object-Oriented Systems <b>Textbook 1: Chapter 1 and 2.7</b> <b>Analysis a System:</b> overview of the analysis phase, stage 1: gathering the requirements functional requirements specification, defining conceptual classes and relationships, using the knowledge of the domain. Design and Implementation, discussions and further reading. <b>Textbook 1: Chapter 6</b> <b>RBT: L1, L2, L3</b>			08
<b>Module 2</b>			
<b>Design Pattern Catalog:</b> Structural patterns, Adapter, bridge, composite, decorator, facade, flyweight, proxy. <b>Textbook 2: chapter 4</b> <b>RBT: L1, L2, L3</b>			08
<b>Module 3</b>			
<b>BehavioralPatterns:</b> Chain of Responsibility, Command, Interpreter, Iterator, Mediator, Memento, Observer, State, Template Method <b>Textbook 2: chapter 5</b> <b>RBT: L1, L2, L3</b>			08
<b>Module 4</b>			
<b>Interactive systems and the MVC architecture:</b> Introduction, The MVC architectural pattern, analyzing a simple drawing program, designing the system, designing of the subsystems, getting into implementation, implementing undo operation, drawing incomplete items, adding a new feature, pattern-based solutions. <b>Textbook 1: Chapter 11</b> <b>RBT: L1, L2, L3</b>			08
<b>Module 5</b>			
<b>Designing with Distributed Objects:</b> Client server system, java remote method invocation, implementing an object-oriented system on the web (discussions and further reading) a note on input and output, selection statements, loops arrays. <b>Textbook 1: Chapter 12</b> <b>RBT: L1, L2, L3</b>			08
<b>Course Outcomes:</b> The student will be able to :			
<ul style="list-style-type: none"> <li>Design and implement codes with higher performance and lower complexity</li> <li>Be aware of code qualities needed to keep code flexible</li> </ul>			

<ul style="list-style-type: none"> <li>Experience core design principles and be able to assess the quality of a design with respect to these principles.</li> <li>Capable of applying these principles in the design of object oriented systems.</li> <li>Demonstrate an understanding of a range of design patterns. Be capable of comprehending a design presented using this vocabulary.</li> <li>Be able to select and apply suitable patterns in specific contexts</li> </ul>
<b>Question Paper Pattern:</b>
<ul style="list-style-type: none"> <li>The question paper will have ten questions.</li> <li>Each full Question consisting of 20 marks</li> <li>There will be 2 full questions (with a maximum of four sub questions) from each module.</li> <li>Each full question will have sub questions covering all the topics under a module.</li> <li>The students will have to answer 5 full questions, selecting one full question from each module.</li> </ul>
<b>Textbooks:</b>
<ol style="list-style-type: none"> <li>Brahma Dathan, Sarnath Rammath, Object-oriented analysis, design and implementation, Universities Press, 2013</li> <li>Erich Gamma, Richard Helan, Ralph Johman, John Vlissides , Design Patterns, Pearson Publication, 2013.</li> </ol>
<b>Reference Books:</b>
<ol style="list-style-type: none"> <li>Frank Bachmann, RegineMeunier, Hans Rohnert "Pattern Oriented Software Architecture" –Volume 1, 1996.</li> <li>William J Brown et al., "Anti-Patterns: Refactoring Software, Architectures and Projects in Crisis", John Wiley, 1998.</li> </ol>
