

B. E. COMMON TO ALL PROGRAMMES Choice Based Credit System (CBCS) and Outcome Based Education (OBE) SEMESTER - IV			
COMPLEX ANALYSIS, PROBABILITY AND STATISTICAL METHODS (Common to all programmes) [As per Choice Based Credit System (CBCS) scheme]			
Course Code	18MAT41	CIE Marks	40
Teaching Hours/Week (L:T:P)	(2:2:0)	SEE Marks	60
Credits	03	Exam Hours	03
<b>Course Learning Objectives:</b> <ul style="list-style-type: none"> <li>To provide an insight into applications of complex variables, conformal mapping and special functions arising in potential theory, quantum mechanics, heat conduction and field theory.</li> <li>To develop probability distribution of discrete, continuous random variables and joint probability distribution occurring in digital signal processing, design engineering and microwave engineering.</li> </ul>			
<b>Module-1</b>			
<b>Calculus of complex functions:</b> Review of function of a complex variable, limits, continuity, and differentiability. Analytic functions: Cauchy-Riemann equations in Cartesian and polar forms and consequences. <b>Construction of analytic functions:</b> Milne-Thomson method-Problems.			
<b>Module-2</b>			
<b>Conformal transformations:</b> Introduction. Discussion of transformations: $w = Z^2$ , $w = e^z$ , $w = z + \frac{1}{z}$ , ( $z \neq 0$ ). Bilinear transformations- Problems. <b>Complex integration:</b> Line integral of a complex function-Cauchy's theorem and Cauchy's integral formula and problems.			
<b>Module-3</b>			
<b>Probability Distributions:</b> Review of basic probability theory. Random variables (discrete and continuous), probability mass/density functions. Binomial, Poisson, exponential and normal distributions- problems (No derivation for mean and standard deviation)-Illustrative examples.			
<b>Module-4</b>			
<b>Statistical Methods:</b> Correlation and regression-Karl Pearson's coefficient of correlation and rank correlation -problems. Regression analysis- lines of regression -problems. <b>Curve Fitting:</b> Curve fitting by the method of least squares- fitting the curves of the form- $y = ax + b$ , $y = ax^b$ and $y = ax^2 + bx + c$ .			
<b>Module-5</b>			
<b>Joint probability distribution:</b> Joint Probability distribution for two discrete random variables, expectation and covariance. <b>Sampling Theory:</b> Introduction to sampling distributions, standard error, Type-I and Type-II errors. Test of hypothesis for means, student's t-distribution, Chi-square distribution as a test of goodness of fit.			
<b>Course Outcomes:</b> At the end of the course the student will be able to: <ul style="list-style-type: none"> <li>Use the concepts of analytic function and complex potentials to solve the problems arising in electromagnetic field theory.</li> <li>Utilize conformal transformation and complex integral arising in aerofoil theory, fluid flow visualization and image processing.</li> <li>Apply discrete and continuous probability distributions in analyzing the probability models arising in engineering field.</li> <li>Make use of the correlation and regression analysis to fit a suitable mathematical model for the statistical data.</li> </ul>			

<ul style="list-style-type: none"> <li>Construct joint probability distributions and demonstrate the validity of testing the hypothesis.</li> </ul>				
<b>Question paper pattern:</b> <ul style="list-style-type: none"> <li>The question paper will have ten full questions carrying equal marks.</li> <li>Each full question will be for 20 marks.</li> <li>There will be two full questions (with a maximum of four sub- questions) from each module.</li> </ul>				
Sl. No.	Title of the Book	Name of the Author/s	Name of the Publisher	Edition and Year
<b>Textbooks</b>				
1	Advanced Engineering Mathematics	E. Kreyszig	John Wiley & Sons	10 <sup>th</sup> Edition, 2016
2	Higher Engineering Mathematics	B. S. Grewal	Khanna Publishers	44 <sup>th</sup> Edition, 2017
3	Engineering Mathematics	Srimanta Pal et al	Oxford University Press	3 <sup>rd</sup> Edition, 2016
<b>Reference Books</b>				
1	Advanced Engineering Mathematics	C. Ray Wylie, Louis C. Barrett	McGraw-Hill	6 <sup>th</sup> Edition 1995
2	Introductory Methods of Numerical Analysis	S.S. Sastry	Prentice Hall of India	4 <sup>th</sup> Edition 2010
3	Higher Engineering Mathematics	B. V. Ramana	McGraw-Hill	11 <sup>th</sup> Edition, 2010
4	A Text Book of Engineering Mathematics	N. P. Bali and Manish Goyal	Laxmi Publications	2014
5	Advanced Engineering Mathematics	Chandrika Prasad and Reena Garg	Khanna Publishing,	2018
